

AIRAC 1806a RELEASE NOTES

1 GENERAL CHANGES

- Various new fixes around the Ohakea, Wellington and Woodbourne areas.
- SIDs and STARs that can be displayed on the scope via the display settings dialogue have been changed to reduce work when updating the sector files. The SID/STAR will now no longer contain the most up-to-date number. Instead, it will display the name of the FIX followed by a #, indicating a number, then the suffix letter (if applicable), e.g AA 05R BASIV#B RNAV, or WN 34 TPAPA#A.

** For the purpose of the virtual world, all disestablished SIDs in Wellington NZWN have been kept in the sector files for pilots with an outdated AIRAC cycle. These old SIDs can be identified by an asterisk (*) after the SID name, e.g. WITBY1A* or DULEX3**

3 OTHER

3.1 Wellington (NZWN) new SIDs:

In regards to Wellington's new SIDs, please note that the transition for aircraft leaving domestic airspace will always be the fix name and not "oceanic transition." The only

NOT FOR REAL WORLD USE

exception to this is aircraft leaving domestic airspace on the two radar SIDs where “oceanic transition,” is still the only transition available.
